

ENERGY & UTILITY SOLUTIONS

Responsive, Innovative Solutions For The Energy & Utility Industry

At Atlas Machine & Supply, Inc., the energy/utility sector is a core component of our business. We expertly handle the diverse needs of power production with precision engineering and innovative solutions. **Our services include everything from turbine housing stud removal and bowl mill rebuilding to the refurbishment of ash water pumps.** We pride ourselves on modifying century-old hydroelectric generator shafts and machining stator mounting slots, ensuring optimal performance with our **in-shop** and **on-site** repair services.

Celebrating over 117 years of family ownership, our dedicated team of machinists and engineers is committed to excellence. **We specialize in fan shafts, aerator slurry shafts, gearboxes, turbine casings, and more.** You can depend on Atlas to help prevent outages, repair, and improve your machinery, making us your reliable partner in the energy/utility industry. Trust us to be your reliable partner, offering innovative solutions that meet your unique needs. **Reach out to our expert team today!**

24 HOURS PER DAY **7** DAYS PER WEEK **365** DAYS PER YEAR

Atlas understands that machines do not break down according to your schedule. That's why we are available 24/7/365. We're here when you need us most.
